## EDUCATION

CEGEP - John Abbott College - Montreal, QC  
**AEC** - Full Stack Developer

08/2023

- Dean's List

Toronto Metropolitan University - Toronto, ON  
**Bachelor**

05/2017

## SKILLS

**Languages:** Java, JavaScript, PHP, Python, C#, HTML, CSS

**Frameworks/Libraries:** Express, Node, React, RESTful APIs, SpringBoot, MVC, .NET, Flask, Bootstrap, Tailwind

**Databases:** MySQL, MongoDB, Mongoose, Amazon Web Services

**Tools:** Git, Heroku, XAMPP, Agile Methodology

## PROJECTS

### Stock Portfolio:

- Developed a full-stack web application utilizing real-time stock APIs to fetch current prices and generate interactive charts, allowing users to monitor gains and losses.
- incorporated technologies such as Bootstrap, PHP and MySQL database to create a stock portfolio management system.
- User-friendly interface with login/registration system to securely store user data.

### MERNe-Commerce Website

- Built an eCommerce platform with customer browsing, reviewing, and payment functionalities, including an admin portal for managing users, products, and orders.
- Fully responsive website, technologies using React, Redux, Node.js, Express and MongoDB.
- Implemented shopping cart functionality with PayPal and credit/debit payment options.
- Intuitive admin area allowed efficient management of customers, products, and orders.
- Incorporated a product rating and review system, enabling user feedback and informed purchasing decisions.

### Social Media Project:

- Developed a SpringBoot-based social media web application, facilitated real-time communication and connection among users, featuring a comprehensive user login and registration system.
- Utilized the MVC framework, Thymeleaf templating engine, and Bootstrap for seamless front-end development.
- integrated a MySQL database to store user information, posts, comments, and likes.

## EXPERIENCES:

**Product Developer – Hatley – 2020-2022 – Montreal, QC**

**Product Developer – Rudsak – 2018-2019 – Montreal, QC**

**Designer – Groupe Dynamite – 2017-2018 – Montreal, QC**

- Achieved a remarkable 160% increase in revenue compared to the previous fiscal year as part of a successful team effort.
- Conducted research, analyzed customer behavior and product selling results to inform decision-making.
- Trained and supervised interns throughout product development cycle, reported to top-management to develop new strategic initiatives and optimize various business processes.
